

Audio-visual resources available for use by Buckingham U3A (as at Nov 2023)

These resources are currently data projectors and PA (Public Address) systems as shown below.
(Full instructions and guidance can be provided)

Portable PA (Trust Fiesta Plus)

This is a wheeled piece of luggage and is ideal for audio in small indoor and outdoor venues. The iPad is not included but you can connect your tablet using either Bluetooth or the Aux input. (There is a slot on top of the machine to hold your smart phone/tablet) It comes complete with a microphone and cable and if needed a radio microphone. It does plug into a standard mains socket (but a connecting lead for use with 12 volts such as a car battery can be supplied if needed)

Please email technical.support@buckinghamu3a.org.uk if you would like to use this

Data projectors (Infocus IN114A and IN114xv)

These can project a presentation from your laptop (or from many other electronic devices) and come complete with the connecting cables and projector screen.

Please email either technical.support@buckinghamu3a.org.uk or Brian Hubbard if you would like to use one of these

PA System in Buckingham Community Hall

Whilst the U3A doesn't own all of this equipment we are allowed to use it for U3A events. It is quite complex but would normally be set up by either a member of the U3A Committee or the Community Centre caretaker but full instructions are available.

Other PA Equipment

This is not U3A Equipment but please contact Buckingham U3A Tech Support if you need 12 volt or mains powered PA Equipment for either a U3A event or any other good cause.
